

# Seed production changes over the years in USA National Parks

EQB

2026-05-05

## How does seed production vary across years for different plant species?

This report is based in data from Nigro et al. (2025). And the report is for the site SEV.

The average number of seeds in this site is 13.3 and the SD 49.8.

### Plot on seed counts
